

COLLAGEN PLUS ORANGE 71D

\$29.88

Collagen is a protein formed by the union of several amino acids, and is produced by cells that have that specific function. However, if it is ingested in its molecular form (hydrolyzed collagen) this is an excellent nutrient which is incorporated easily into the organism. It is very important in the skin, because it prevents deep wrinkles, increases hydration, shine and skin tone. Vitamin C is very important to achieve the synthesis of collagen. It is known that collagen accelerates wound healing and increases skin cells.

How does it help the body?

- Helps improve the appearance of hair, skin and nails.
- Helps improve or strengthen body parts (cornea of the eye, bones, skin, blood vessels, heart, gums, bladder, etc.)

It prevents:

- Skin damage.
- Cancer cells.

Amount & Instructions
