

MAGNOTUN 31

\$81.35

Cell tumors are malformations that develop out of control. There are benign and malignant tumors. These can be caused by a toxic diet containing carcinogens, or even by free radicals (oxidation), radiation, excess of certain hormones like estrogen or inheritance.

The immune system usually destroys small outbreaks of these abnormal cells, the problem comes when the immune system is weak and these cells grow uncontrollably. We recommend taking: antioxidants such as vitamin C and E, minerals like zinc and selenium, which neutralize free radicals.

These nutrients are found in vegetables such as broccoli, Brussels sprouts, cauliflower, carrots, beets and red tomato.

Three actions are important to fight tumors:

- 1) A strong immune system.
- 2) Fight Cellular Oxidation.
- 3) Eliminate Body Toxins.

GELATIN, ASCORBIC ACID, DL-ALPHA TOCOPHEROL, ZINC POLYNICOTINATE, SELENIUM YEAST, HERBAXIN-7 PROPRIETARY BLEND (8 MG): [POMEGRANATE EXTRACT (FRUIT), MANGOSTEEN EXTRACT (FRUIT), ACAI EXTRACT (FRUIT), GOJI (FRUIT), CRANBERRY (FRUIT), CLOVE (OIL), GRAPE EXTRACT (SEED AND PEEL)], MAGNESIUM STEARATE.

How does it help the body?

- Helps strengthen the immune system.
- Eliminates toxins from the body.
- Anticipate inflammation of saturated fats.

It prevents:

- Cellular oxidation.
- Carcinogens.
- Free radicals (oxidation).
- Radiation caused by the excess of certain hormones.
- Abnormal (harmful) cell.
